Operation Instructions

Power ON:

When the headset is off, Press and hold the Multi-function Button (MFB) for 3 seconds. The LED indicator will flash slowly in blue. At this time, you will hear a tone that increases in volume from the speaker of the headset.

Power off:

When the headset is on, press and hold the MFB for 4 seconds. The LED indicator will flash slowly in red. At this time you will hear a tone that decreases in volume from the speaker of the headset. The headset will turn off automatically when disconnected with any phone in five minutes.

Pairing mode:

When the headset is OFF, press and hold MFB for 6 seconds until LED flashes red and blue in alternating colors. If you release MFB before headset goes into pairing mode it will power on and connect with the last paired handset. If you want to pair the headset with a new phone, please power it off and then enter pairing mode. The headset will stop pairing when fail to connect with any phone in three minutes.

Answering calls:

If a call comes in when listening to music or headset standing by, Press MFB to answer the incoming in call. The music will be paused during that time.

End calls:

Press MFB button to terminate a phone call. If you are listening to the music previously, it will restart again.

Reject calls:

If a call comes in when listening to the music or headset standing by, press and hold MFB for 2 seconds to reject the call. At the same time you can hear a rising beep from the speaker of the headset.

Last number redial:

When listening to the music or headset standing by, Double click MFB to redial the last number. At the same time you can hear a tone that increasing in volume from the speaker of the headset. The music

will be paused during these time.

Switching Between Your Mobile Phone and Headset:

To switch between your mobile phone and headset, double-click the MFB.

Reconnect:

When the headset and mobile phone are disconnected, you can press MFB to reconnect.

Pause and restart a music：

Click MFB button to pause the music, click MFB again to restart it.
